Pilgrims of **Change**: Walking the Steps of The Economy of Francesco

The EoF School has reached its 5th edition and is ready for a transformation.

We'll have fewer traditional lectures (2 guest speakers) and more interactive lectorials (6 sessions). These will include active student participation through fishbowl methodology and breakout rooms, ensuring a balance between academic, entrepreneurial, and change-maker perspectives.

By subscribing, you'll join an engaging and collaborative learning journey, exploring core topics that the EoF community has focused on over the past five years. Each topic connects to one of the three Franciscos of EoF: Pope Francis, St. Francis of Assisi, and the EoF youth community.

While we continue to feature guest lectures (this year by Kate Raworth and Jennifer Nedelsky), our focus shifts to creating an educational space where we receive and co-create knowledge among people within the EoF community. Our new lectorials—combining lectures and tutorials—will group students by interests, fostering small communities within the school.

Join us in transforming the learning experience and walking the steps of the Economy of Francesco!
